

Meet Gas Sector Decision-Makers from Angola and Mozambique

Learn about midstream gas infrastructure opportunities in Angola and Mozambique. High-level decision makers will provide U.S. companies with valuable market intelligence about strategic priorities and upcoming procurement opportunities worth billions.

DATE **October 20, 2026**

TIME **8:30 a.m. - noon CDT**

PLACE **Houston, TX**

Background

In **Angola** and **Mozambique**, rapid growth in the gas sector is accelerating demand for midstream gas infrastructure, creating opportunities for trusted U.S. technologies, engineering expertise, and high-quality equipment to advance energy security and economic growth. Both countries currently have billions of dollars in commitments for infrastructure projects like floating and onshore LNG facilities, gas capture and flaring reduction, offshore-to-onshore pipelines, treatment and processing plants, and storage facilities.

Business Opportunities

- Floating and onshore LNG **facilities**
- Gas **capture** and **flaring** reduction
- Pipelines
- Gas **treatment** and **processing** plants
- **Gas storage** facilities

About USTDA

The U.S. Trade and Development Agency is the U.S. government's first mover on critical infrastructure development in emerging markets, advancing the shared strategic priorities of the United States and our overseas partners while creating opportunities to deploy trusted U.S. solutions. USTDA funds the upfront technical work that accelerates the development of infrastructure projects, helping them attract the financing they need for implementation and procurement of U.S. goods and services.
