

U.S. – Southern Africa Grid Security Business Briefing

USTDA invites U.S. companies to gain firsthand insight into opportunities in securing and modernizing Southern Africa transmission and distribution systems by engaging with African power sector leaders. U.S. participants will hear from decision-makers and can meet one-on-one to showcase their technologies.

DATE **September 1st, 2026**

TIME **1pm - 6pm CDT**

PLACE **Grant Hyatt, Denver, CO**

Background

Transmission and distribution networks play a vital role in Southern Africa, where rapid population growth, accelerating urbanization, and rising industrial demand are driving the need for secure, modern power infrastructure. Regional planners and power institutions are prioritizing major interconnection and transmission and distribution modernization efforts, opening the door for trusted U.S. technologies, engineering expertise, and high-quality equipment for communities throughout the continent. African participants will join from Angola, Botswana, Mozambique, Namibia, and Zambia.

Business Opportunities

- AI-enabled **grid control systems**
- **Grid-enhancing** technologies
- Energy **storage**
- Energy **stability solutions**
- **Financing mechanisms** for implementation

About USTDA

The U.S. Trade and Development Agency is the U.S. government's first mover on critical infrastructure development in emerging markets, advancing the shared strategic priorities of the United States and our overseas partners while creating opportunities to deploy trusted U.S. solutions. USTDA funds the upfront technical work that accelerates the development of infrastructure projects, helping them attract the financing they need for implementation and procurement of U.S. goods and services.
